ROSA ARISTY

Founder | Speaker

TESTIMONIAL

"Everything you said resonated with me 100%. I discovered not long ago that my child has severe math anxiety... You said that we don't need to drill math facts, and I almost fell out of my chair because that's what is pushed so much... I'm just thankful to have been able to take away so many valuable gems from your presentation."

SPEAKING TOPICS

- From Consumers to Creators of Technology
- Celebrating Creative Computing and Cultures
- Math and Science Can Be Fun!
- Math Circle Puzzle Fun

VENUES INCLUDE

Rosa is a home educator, social entrepreneur, and lifelong learner. She is the Founder of Bridges to Science and a sought after speaker. Rosa earned a Bachelor of Science in Business Administration from Pontificia Universidad Católica Madre y Maestra graduating with highest honors as the class valedictorian. She continued her love of learning by earning a Master of Science from the University of South Carolina.

Post-graduation, Rosa utilized her STEM education to quickly advance to a leadership position at FedEx where she served on a marketing team pioneering data science.

She is originally from a small coastal city in the Dominican Republic. Her father, an advocate for democracy and human rights, and her mother, a high school math teacher and a daring problem solver, cultivated in their children a desire to make the world a better place.

Rosa recognizes that education has been and is a way to a more promising future. She sees Bridges to Science as her calling to serve. She partners with donors, volunteers, universities, organizations, and parents to inspire Hispanic, home educated, and other underserved kids to grow as creative problem solvers and pursue college-bound paths. This is her passion, mission, profession, and vocation.
